PARDHA SARADHI CHAKOLTHI

Email: pardhasaradhichakolthi@gmail.com

LinkedIn profile: www.linkedin.com/in/pardha-saradhi-chakolthi-5b1b4a2b1

Telephone number: +44 7909925118

Profile

Full-stack developer and recent MSc Computer Science graduate from the University of East London. Skilled in Java (Spring Boot, Hibernate), React.js, and Python (Flask, Django) with hands-on experience building secure, scalable web applications. Strong understanding of REST APIs, microservices, and cloud-native deployment on AWS and Azure. Experienced with data processing tools (Hadoop, Spark) and workflow automation using n8n and Make. Seeking a graduate-level software engineering role where I can apply my technical expertise, contribute to innovative projects, and grow within a dynamic team.

Technical Skills

- **Programming Languages**: Java, JavaScript, Python, C, C++
- **Frameworks & Libraries**: Spring Boot, Spring Microservices, Hibernate, React, Flask, Django
- **Cloud & DevOps**: AWS, Azure; Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD Pipelines
- **Automation & Workflow Tools**: n8n, Make
- **Data & Big Data Processing**: Apache Hadoop, Apache Spark; MySQL, PostgreSQL, MongoDB, Firebase
- **Machine Learning**: Data Preprocessing, Classification, Model Evaluation, Hyperparameter Tuning, Debugging
- **Deep Learning**: TensorFlow, Keras, CNNs, Transfer Learning

Experience

Software Developer Intern - House of Companies
Jun 2025 - Jul 2025

- Developed and implemented software applications, contributing to production-quality features.
- Applied strong skills in **Java, Python, and automation tools (n8n, Make)** to streamline workflows.
- Collaborated on full-stack modules, ensuring clean, maintainable, and efficient code.
- Actively learned and integrated emerging technologies to enhance internal systems.
- Recognised by the director for high motivation, problem-solving ability, and code quality.

Application Development Associate - Accenture
Oct 2021 - Dec 2023

- Built and maintained full-stack applications using **Spring Boot** and **React.js**, serving thousands of users.
- Designed and optimised **RESTful APIs** and microservices architecture.
- Deployed containerised apps with **Docker** and **Kubernetes** on **Azure** for zero-downtime releases.
- Implemented **CI/CD** pipelines via **Jenkins** and **GitHub Actions**, streamlining deployment cycles.
- Automated data flows and alerts using **n8n** and **Make**, cutting manual reporting effort.

Education

MSc Computer Science (with Industrial Placement) **-** University of East London

Jan 2024 - Present

Modules: Cloud Computing, Artificial Intelligence & Machine Vision, Advanced Software Engineering, Big Data Analytics.

Dissertation: *Real-Time Climatic Suitability Modelling for Ixodes hexagonus Using Presence-Only Data in Urban UK Environments* (Accepted for IEEE 3ICT 2025).

Certifications

- AWS Certified Cloud Practitioner
- Microsoft Azure Administrator (AZ-104) – In Progress
- Spring Boot & Microservices with Hibernate
- The Complete Agentic AI Engineering Course

Publications

- **Real-Time Climatic Suitability Modelling for Ixodes hexagonus Using Presence-Only Data in Urban UK Environments** — Presented at IEEE 3ICT 2025, Session S4-E: e-Government; e-Health; e-Business.
- **Alzheimer's Disease Analysis Using Machine Learning Approach** — Presented at the IEEE International Conference on Innovation & Intelligence for Informatics, Computing, and Technologies (3ICT) 2025, Session S5-C: Deep Learning; Knowledge Representation; Pattern Recognition.
- **AI-Powered Brain Tumor Detection Using Convolutional Neural Networks** — Presented at IEEE 3ICT 2025, Session S4-D: Deep Learning; Machine Learning.
- **An Intelligent IDS/IPS Framework to Fortify Industry 4.0 Applications** — Presented at IEEE 3ICT 2025, Session S4-A: Telecommunication and Networking-2.

Projects

Real-Time Ecological Risk Modelling System for Urban Ticks – Ixodes hexagonus

Dissertation Project | IEEE 3ICT 2025 Conference Paper

- Designed a real-time ecological prediction system for *Ixodes hexagonus* using One-Class SVM and climate data.
- Built scalable microservices architecture (React, Spring Boot, FastAPI) for web-based deployment.
  Integrated Visual Crossing API for location-specific suitability modelling across the UK.
- Validated ecological predictions using hedgehog proximity analysis; presented at IEEE 3ICT 2025.

Hobbies & Interests

Active member of an Adventure Club, organising hikes and outdoor expeditions that build leadership and teamwork skills. Enjoy creating personal coding projects and experimenting with automation tools like n8n and Make to learn new integrations and enhance productivity.
